DETAILED ACTION

Allowable Subject Matter

1. Claims 10-25 are allowed.
2. The following is an examiner's statement of reasons for allowance:

With respect to independent claims 10, 18 and 21, the prior art fails to disclose, teach or suggest an in-line skate wheel suspension product particularly comprising: a truncated pivoting axle pivotally connecting the first rocker arm and the second rocker arm to at least one of the tracking system side panels; a spring being positioned above the truncated pivoting axle; the spring being positioned between the first rocker arm and the second rocker arm; the spring contacting the first rocker arm and the second rocker arm and biasing the rocker arms so that the rocker arms counter-rotate about the truncated pivoting axle; the spring contacting the first rocker arm at a position radially between the truncated pivoting axle and the first skate wheel connection; and the spring contacting the second rocker arm at a positioned radially between the truncated pivoting axle and the second skate wheel connection. These structures in combination with other structures as recited in claims 10, 18 and 21 define over prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
